

## Recent COVID News

- **Eviction Protection & Rental Assistance available.** Renters affected by COVID-19 may be eligible for up to 15 months of rental assistance & may be protected from evictions, given certain requirements. See [LoveDecatur.com/covid/](http://LoveDecatur.com/covid/)

- **The Pfizer vaccine has full FDA approval** as of August 23, 2021 for the 2-dose regimen for anyone age 16 or older. Booster shots and 2-dose regimen for age 12-15 is still under Emergency Use Authorization, as of August 27, 2021

### Stuff I want you to know

**Continue to get medical care** you need. Don't skip Dr. appointments, surgeries, scans at the hospital. Get your meds from the pharmacy. Use telehealth or prescription delivery if you're worried.

There are **about 15,000 children** under 12 in Macon County who can't get vaccinated and can get sick. COVID can still use them to perpetuate this pandemic, mutate into new strains, and spread.

### Hospitalizations

Macon County Health Department held a press conference on August 13, 2021 with both local hospital CEOs, where they talked about the rise in COVID hospitalizations. DMH CEO remarked having about 30 covid patients locally and about 85% of them being unvaccinated.

On August 30, 2021, HSHS Reports for all their hospitals, regarding COVID patients:

- 168 hospitalized. 140 unvaccinated (83.33%)
- 43 in the icu. 36 unvaccinated (83.72%)
- 21 on ventilators. 19 unvaccinated (90.48%)
- 94 hospitalized people are age 65 or younger

On Sept 3, 2021, Memorial Health Systems Reports for all their hospitals, regarding COVID patients:

- 79 hospitalized. 65 unvaccinated (82.28%)
- 28 in the icu. 27 unvaccinated (96.43%)
- 16 on ventilators. 16 unvaccinated (100%)

### How do mRNA vaccines work?

The coronavirus produces spike proteins. mRNA is a genetic messenger. It instructs your cells to make the spike protein, then your cells break down the mRNA. Your body has an immune response to the protein, which prepares it for future contact with the actual COVID19 virus (SARS-CoV-2). The vaccine does NOT contain ANY virus.

As of August 27<sup>th</sup>, 2021:

- 5.1 billion doses have been given worldwide
- Over 93 million people in the U.S. have received the Pfizer vaccine. 65 million have had Moderna. 14 million have had J&J
- In Illinois, over 6 million people have been fully vaccinated.
- In Macon County there are over 43,000 people fully vaccinated, but that's only 41% of people here

The more we vaccinate, the less it spreads. The less it spreads, the less it mutates. I just want life to go back to normal & for our community to be safe.

**Please help & vaccinate**
