

"Some children [might require] hospitalization, intensive care, or a ventilator to help them breathe. In rare cases, they might die." - CDC

"Babies under 1 year old and children with certain underlying conditions may be more likely to have severe illness". like asthma, diabetes, sickle cell, heart disease, obesity, and more. - CDC

"If your mom or dad or spouse was in the hospital and was very sick, you would be at their bedside holding their hand," [Dr.] Remy says. With fatal Covid-19, your last meaningful contact with family, before your final hours, might be as you get admitted into the ER, days or weeks before.'

Take action

- Call 217-424-2801 (the city) and ask what the city is doing about the recent spike in cases & the delta variant.
- Talk to your friends and family. Listen. Their concerns are real and valid. Be kind. Educate. Be patient. And remember that there's an anti-mask, anti-vax propaganda machine. Don't let your loved ones be victim of preventable illness.

Covid in Decatur Area

For 5 weeks in a row, Macon County had less than 20 new Covid cases. The last four weeks, there have been 31 new cases (Jul 9th), 22 (jul 16), then 52 (jul 23), then 73 new cases as of July 30th

Of 104,712 people in Macon County, 63,939 people are not vaccinated. About 15,000 are too young to be vaccinated.

On July 9th, the MC Health Dept reported 1 delta variant. On July 27th, they reported 5. In this time, we have 3 new cases of the Brazil P.1.1 variant.

If Vaccinated, you are:

- 3 times less likely to contract covid
- 10 times less likely to die or get really sick
- You could still get others sick

109,888 vaccine doses have gone unused in IL.

Getting Vaccinated

Where:

- Kroger walk-in vaccines from 11:30am to close
- Crossing Healthcare
- Macon County Health Dept
- CVS & Walgreens
- Walmart during pharmacy hours by appointment

How:

Walk in to kroger and go to the pharmacy. Or search "Cvs covid vaccine" online. Or CrossingHealthCare.org/covid19. Or vaccines.gov

The process:

You go in. Maybe you stand in line a minute. You get a shot in your arm. You sit for 15 minutes as with all vaccines. You go home. You come back for your 2nd dose in 3 or 4 weeks if its an mRNA vaccine.

"I'm scared to get the vaccine":

Call the 24/7 state hotline at 1-800-889-3931 and ask your questions. Your fears are valid, and all this stuff is overwhelming and confusing. I want you to be safe.

"I can't afford it": Its free for almost everyone.

"I don't want to get sick from the vaccine.":

- Vaccine centers are prepared to handle very rare allergic reactions an anaphylaxis
- Talk to your doctor if you have underlying health conditions. Check our site for links with more info.

Covid19 can cause long term lung, heart, and brain damage, and long term symptoms like loss of smell, depression, fatigue, memory problems, & more

The majority of deaths are those age 60+, though a lot of other people have died. The majority of cases are under age 60. So young people are likely getting sick indiscriminately, spreading it to older people, and killing them. **Take responsibility for the health of our community.** Its on your hands.

"During 2000-2018, measles vaccination prevented an estimated 23.2 million deaths making measles vaccine one of the best buys in public health." - WHO

Let's beat this, like we did measles. **Vaccinate.**
